### **RUBB REPEATS STORAGE FOR SANITARY WARE MANUFACTURER**

The UK's top bathroom manufacturer Ideal Standard recently purchased another Rubb building to meet their rapidly expanding storage requirements. The manufacturer, which has eight plants sited throughout the UK, required additional storage space in 2002 when a 12m (39.4') x 30m (98.4') Rubb THA shelter was purchased and erected at the company's Hull plant.

Pleased with the product, price and flexibility of use that such re-locatable storage provided, Ideal Standard ordered an additional THA shelter late last year measuring 12m (39.4') x 42m (137.8'). Speaking for Ideal Standard, project manager Neil Owen says, "Bathrooms these days are a fashion

business and flexibility of supply has become a customer demand for us, especially in our 'Jewellery Box' sites like Hull and Middleweight, which are producing high design products to, almost, one-off order. The flexibility of storage that the THA shelter provides enables Ideal Standard to better satisfy the needs of the market, especially when new trends and new ranges have to be catered for."

The Rubb organization, with production facilities in Great Britain, Norway and the United States is recognized as a world leader in the design, development and manufacture of relocatable structures and is quality certified to ISO9001: 2000.
